📁 Portfolio

Profile

Java developer proficient in Spring Boot, Java, JPA/Hibernate, SQL, PostgreSQL, and HTML, with hands-on experience in backend development using Spring Cloud (Eureka, OpenFeign, Resilience4j), Redis, Kafka, AWS, Docker, Maven, Git, and Swagger. Developed a secure ride-booking backend with JWT authentication, Spring Security RBAC, OSRM routing, optimized queries, and full ride lifecycle management. Architected a microservices platform for job networking featuring RESTful APIs, Neo4j graph queries, Kafka event-driven notifications, Spring Cloud Gateway with JWT filter, and Docker Compose orchestration. Gained J2EE expertise through a 6-month internship at Thought Applied Creations.

Projects

Cab-booking-backend-springboot

Jun 2025

Developed a Spring Boot backend enabling online ride booking with JWT-based authentication, authorization, and RBAC using Spring Security and PostgreSQL.

Implemented ride booking strategy with multiple design patterns to optimize driver matching and reduce ride waiting time. Integrated OSRM routing engine to calculate shortest path and ETA, implemented fare calculation. Managed complete ride lifecycle from request to payment processing.

Designed relational schemas, optimized search queries to reduce response latency, and added global exception handling using @ControllerAdvice.

Jobseekers Backend Networking Platform

Oct 2025

Architected and developed 4 microservices (User, Post, Connection, Notification) with Spring Cloud Gateway as API Gateway, implementing JWT validation and authentication propagation via gateway filters. Configured Eureka Server for service discovery and used OpenFeign for inter-service communication. Implemented rate limiting using Resilience4j and distributed tracing with Zipkin and Micrometer.

Containerized microservices using Docker, built images via Maven Dockerfiles, pushed to Docker Hub, and orchestrated using Docker Compose.

Core features: RESTful APIs for user registration, authentication, and profile management. Post creation and likes. Connection requests (send/accept/reject). Graph-based network traversal using Neo4j. Event-driven notification system using Kafka (producer in Post & Connection, consumer in Notification).

Certifications

- **Spring Boot Fundamentals:** Covered Spring MVC, dependency injection, and REST API development. Gained hands-on experience with JPA/Hibernate including entity mappings, cascading, transactions, pagination, and N+1 query optimization. Implemented input validation, global exception handling, and API response transformation. Explored Actuators and OpenAPI/Swagger. Covered Spring Security internals, JWT authentication with refresh/access token flow, OAuth2, and RBAC using @PreAuthorize and @Secured annotations(Jun 225-Sep 2025). [Certificate](#)
- **Spring Boot Advanced:** Covered AOP, Redis caching, and transaction management with isolation levels and optimistic/pessimistic locking. Built microservices using Eureka, Spring Cloud Gateway with JWT filter, OpenFeign, and Resilience4j (rate limiting, circuit breaker, retry). Implemented Spring Cloud Config, distributed tracing with Zipkin and Micrometer, and event-driven architecture using Kafka. Containerized applications with Docker and orchestrated using Docker Compose(Oct 2025-Feb 2026). [Certificate](#)
- **LeetCode 50 Days Badge 2025:** Acheived Badge of Solving problems consistently for 50+ days in 2025 [Certificate](#)
- **GFG 160 days of Problem Solving:** Completed 22-week intensive DSA course by GeeksforGeeks (Nov 2024 – Feb 2025) [Certificate](#)

Professional Experience

Thought Applied Creations

Apr 2022 – Sep 2022

Intern Developer

Developed web-based modules using J2SE and J2EE technologies. Built backend functionality using Servlets and JSP for request handling and dynamic page rendering. Used JDBC for database connectivity and performed CRUD operations with SQL. Collaborated on structured development following MVC pattern.

Technical Skills

Languages: Java, HTML, SQL, CSS

Frameworks: Spring Boot, Spring Security, Hibernate JPA

Platforms: AWS, Swagger, maven, Postman

Tools: Git, GitHub, VS Code, IntelliJ IDEA

Architecture: Microservices, Rest Api, Kafka, Docker

Databases: MySql, PostgreSQL

Education

Raipur Institute of Technology (Affiliated to CSVTU)

Aug 2020 – Jul 2022

Master of Computer Application (CGPA: 7.86)

Raipur, Chhattisgarh

Pragati College (Affiliated to PTRSU)

Aug 2016 – Jul 2019

Bachelor of Science (Computer Science)

Raipur, Chhattisgarh
