SUMMARY

Backend-focused Software Engineer with an MCA, experienced in building scalable Spring Boot applications and microservices using Spring Cloud. Developed backend systems including a Cab Booking platform with OSRM integration and a distributed networking platform using Kafka, Neo4j, Docker, and Kubernetes (basic).

TECHNICAL SKILLS

- **Programming:** Java (Java 8, Core, OOP, Collections, Strems, Exceptional Handling), HTML/CSS, SQL,
- **Backend Dev:** Spring Boot , Spring Boot MVC, Spring Security, RBAC, Spring Cloud REST APIs design, Kafka (Producer and Consumer), Microservices, Spring Data JPA and Hibernate, devTools.
- **DB:** MySQL, Neo4j(Basics), PostgreSQL
- **Tools and Tech:** IntelliJ, VSCode, Eclipse, Git, GitHub, Spring Boot, Postman, AWS RDS, Docker, Maven, Open Api swagger, DBeaver.

PERSONAL PROJECTS

Cab Booking Backend Spring Boot Project **LIVE** | **Code** | *Jun – Sep | 2025*

- Developed a Spring Boot backend enabling online ride booking with JWT-based authentication, authorization and RBAC using Spring Security.
- implemented Ride booking strategy with multiple Design patterns to optimize driver matching and reduce ride waiting time. Integrated OSRM routing engine to calculate shortest path, ETA implementing fare calculation. Managed complete ride lifecycle from request to payment processing.
- Designed Relational Schemas, Optimized search queries and reduce response latency and add global exception handling using @ControllerAdvice.

Jobseekers Backend Networking Platform **Code** | *Oct-Dec 2025*

- Architected and developed 4 microservices (User, Post, Connection, Notification). Built Api gateway with validated JWT and propagate authentication. Containerized microservice using docker desktop and build images via maven Docker files and push to docker hub. Orchestrated services using docker compose.
- Core features: Design RESTful APIs User registration, authentication and profile management. Post creates/ like functionalities. Connection requests send/accept/reject. Graph based connection queries using neo4j for degree-based network traversal. Event-driven notification system using Kafka producer in post and connection and consumer in notification.

CERTIFICATIONS

Spring Boot 0 To 1 Fundamentals and Advanced **Coding Shuttle** | *June-Dec | 2025*

TCS ION NPT – IT Web Designer **Tata Consultancy Services**| *Sep 2025*

EDUCATION

Master's in computer application **Raipur, India**|*2020 - May 2022*

***CGPA**: 7.86* *Raipur Institute of Technology (CSVTU)*

- **Concentrations:** Software Engineering and Backend development (Java, Spring Boot)
- **Related Coursework:** DSA, OOP, Java programming, DBMS, Operating System, Computer Network.

Bachelor of Science (Computer Science) **Raipur, India** | *2016-2019 | Pragati College Raipur,PTRSU*
